

# learn

**LE**aders **A**ctivating **R**esearch **N**etworks:

Implementing the LERU Research Data Roadmap

## LEARN stands for:

- Raising awareness in research data management (RDM) issues & research policy
- Communicating the existing LERU Roadmap to an international community
- Encouraging the production of RDM policies at an institutional level
- Stimulating further research on RDM issues

### What issues does LEARN address?

- Roles and responsibilities
- Infrastructure
- Training (skills)
- Costs
- Law and policy

### Who are the LEARN stakeholders?

- Researchers
- Support services
- Research institutions
- Policy makers
- Funders

Funded by the  
European Union

## What is the LERU Roadmap for Research Data?

It is a roadmap written by the League of European Research Universities on how to **tackle the challenges that research data poses.**

→ The full LERU Roadmap can be found at [bit.do/leruroadmap](http://bit.do/leruroadmap)

LEARN will create and distribute:

**A model RDM policy**

→ to be used by universities and research institutions everywhere

**A Toolkit of RDM best practices**

→ Based on 5 workshops in 5 countries

**An Executive Briefing**

→ Summarising the LERU Roadmap,  
the model RDM policy and the Toolkit of best practices

→ Go to [www.learn-rdm.eu](http://www.learn-rdm.eu) or find us on  
social media to get involved!
